

MNG INTERNATIONAL INC. CALIFORNIA PROPOSITION 65 STATEMENT

February 27, 2023

A California law called Proposition 65 has been in force since 1986 with the goals of promoting clean drinking water and preventing harmful compounds that cause cancer and birth defects from being used in consumer items. The Safe Drinking Water and Toxic Enforcement Act of 1986 is the official name of Proposition 65. Cal/Office EPAs of Environmental Health Hazard Assessment oversees administering it (OEHHA). Everybody who is reasonably at danger of exposure must be informed when poisons are present, according to the law. That has been the impetus behind the inclusion of notices of specific contents to consumer goods labels ever since it was enacted. In addition to the new label requirement, a formal list of compounds that are implicated is kept and made available to the public.

Currently, there are over 700 compounds recorded, and according to the most recent scientific knowledge, entries are added or removed. Each item is listed along with its known or suspected risks, a specific CAS chemical identification number, the date it was added to the list, and, if applicable, if it has since been removed.

MNG International Inc. is dedicated to abiding by all requirements of Prop 65.
